

Requesting Research Participants

Please help us with our experiment!

Purpose

This experiment is designed to help us understand how physically disabled individuals interact with robots.

Requirements

We are recruiting persons with all types of physical disabilities (short-term and long-term) to participate in a short experiment that involves interacting with a robot and answering some questions about their perceptions of robots.

Who We Are

This project is funded by the National Science Foundation through the University of Central Florida. This research is being conducted toward the fulfillment of Ph.D. requirements for Tracy Sanders, M.Sc., under the advisement of Dr. Peter Hancock.

Compensation

We will pay \$10 to each participant who completes the experiment.

Contact

If you are interested in participating or are involved with a group or facility where we could potentially recruit participants, please go to http://ucf.qualtrics.com//SE/?SID=SV_eRrLbtnetcDMYUR

If you have any questions, please email Tracy at tracy.sanders@knights.ucf.edu
